Basically the anti-cheat. I like ren just how it is, the cheaters are what ruined it :/ Downloading maps really isn't too much. Seeing as how there is a map downloader out now, where you can just select the map you want and download it.

[I know the tt patch won't work like that, just saying]

The graphics are just a plus in the patch to me. I honestly had no clue they were updating the graphics until I saw the ss of islands. Thought it was just big fixes, anti-cheat, and resource downloader.

The bug fixes are the next thing in line for me. I absolutely hate driving near a wf, then my tank dying. Then repairing it and it dying again ><

Anyway, never really said anything regarding the tt team. Mainly just browsed the forums just to see what's up. Keep up the good work on the patch guys. I know some people act like complete assholes by asking when this is out then bashing you guys because it's taking so long. I guess they don't understand the time and effort it takes to basically redo a game. :/
