OrcaPilot26 They released those Renegade 2 models a while ago, but it doesn't seem like anybody's been using them. I am attempting to "restore" these models to working condition.

I'm not sure I'll release this but who knows.

Apocolypse Tank:

Vulture Helicopter, this appears to be a modified Hind:

Kirov Airship, props animated, 2 of the engines rotate like the orca's, new bomb model:

Rhino Tank:

These are some impressive models, Renegade 2 would've been a good game.
where did youi get the shots from
