---

Man-made Web Bots even think something is going to happen in 2012. This is real, it was talked about on the History Channel.

The Mayans, the I Ching, and these "Web-bots" all point to 2012 as the end of the world. What do you all think is really going to happen? I've become very intrigued by this in the past months, and I've come to the conclusion that this may actually be real. The source of all this phenomena, I believe, is from an extra-terrestrial species. I know it sounds crazy, but just how alone do you really think we are in this universe?
