Ripping is illegal AFAIK if there is a copyright on it.

I don't know about the topic though (if you mean the one with cnc3 stuff) since EA released packs by themselves containing textures, 3dsmax models, UI textures and a lot more. So if these are the same it wouldn't be a problem.

I voted "YES" but if these textures are indeed the same as in the packs EA released, it isn't illegal. Not very useful you ripped it than though
