k in order for me to download that file you need to update to 1.037

i had renguard 1.0232 or something like that

so after the update, when i try to start renegade its says: insert CD  
its like trying to play the game without renguard

so i look up the renguard shortcut in C/westwood/data and when i try to start renegade i get an  
error saying:

Can't find the Accespoint of the procedure:  
Detect\_bandwidth@ @YYY.....

(Its in Dutch language)
