Subject: How the heck do u obby walk?
Posted by --oo00o00oo-- on Mon, 11 Aug 2003 11:46:44 GMT

Majiin Vegetaok this ONLY works on windows 98 2000 and maybe 95 wont work on XP dont ask why

anyway get in position where the ob cant shoot you...now hold CTRL
and take a step forward..now dont let go..and now hold ALT and take a step forward... now press DELETE 2 times 1..then 2.. and run into the oblisk...

if this doesnt work you did it wrong man...

hope this helps....

it will work on XP, i have XP and i have done it. sometimes i make it and sometimes i dont.
