Canadacdn wrote on Wed, 06 May 2009 02:23 Anyway, I'm a little annoyed that I'll have to format to upgrade from the Windows 7 beta, but whatever. I'll do it eventually. The beta was great, but had a few problems that I hope are fixed in the RC.

Yeah, this is why I install it in a VM. I was hoping the RC would be upgradable to the final release so I could start using it as my main desktop OS, but unfortunately this is not the case, so I will stick with my VM for the time being. Once it goes RTM I will reformat and install it as my desktop OS.
