I was wondering what is FPS and do i want a low number or a high number??  
and i noticed that on n00b stories crimson said The crimson79 Renegade server is back online,  
but my new cable modem keeps dropping people. I will probably revert to the old one today. umm  
could that be my problem too that my cable modem cant hold people because i am almost certain  
that i should be able to have a lot more than 4 people and when i put it on t1 it says connection to  
player lost for everyone and the game ends? any ideas on how i can fix this. P.S i have cable
