Ok, so I had my friend (Blacky) help me out. He said all I need is winrar, so we go into the installation folder in the ren CD and start to extract Game1.cab to C:\Westwood\Renegade folder. Then we installed all the Ren updates, 1.037 patch, cp2, ren scripts. Then I launch game2.exe and have no problems til i get to WESTWOOD ONLINE. It says westwood components not installed, so i go here http://www.renegadeforums.com/index.php?t=msg&goto=330413&rid=0 to find out why, so i get the RenFDS, install the WOL Components, and apply them to the C:\westwood\ Folder (When they are in the Internet Folder). Then i go and run Westwood Online again, this time it doesnt say something about westwood components. I try to login, it says i have invalid serial, so i go to these forums and find the serial changer, i put in my serial, it says serial applied. Then i try westwood again, it says invalid serial again. So i go in my regedit and my renegade folder, and look at my serial, I put in my encrypted serial, and try westwood online again, i get the same problem once again. How would i fix this?
