crysis992 and me wanted to make a whole ren skin pack for the tt patch.
The theme of the skin pack was
nod to scrin from cnc3
and gdi to tiberium monsters
the idea was good and some big parts were finished
but the motivation was gone so we decided to make another skin pack.
The theme now: A path Beyond.
we started today so just 2 vehicles
but we decided to release the GDI characters.
Here are some screenshots of the chars.
