Throughout my many years of playing Renegade I have come to notice that for whatever reason there is a VERY limited number of building skins available for download. I have decided to share a bunch of them that I have made with you guys. I am only uploading some of my GDI buildings for now. NOD will come later.

BLACK AND BLUE BUILDINGS-

GREEN AND DARK GRAY-

WHITE AND LIGHT GRAY-

BLACK AND GOLD (for Steeler fans lol)-

These are only a few that I have made. If anybody has any special requests please pm me or post here and I can try to make you what you want. Please post some feedback/suggestions. Hope you all enjoy!
