Hello im learning Character Modeling, tryed some ways like:

Box Modeling  
Plane Modeling etc.

But they were not perfect, i couldnt smooth them good to make them look good ingame, and TurboSmooth gave a way to much Polygons. And now i wanna give another try with another way but i cant find these Textures:

anyone know where i get textures like these? (should be textures of soldiers) because i want to make some chars for

Renegade: Scorched Earth.  
Thanks, madrackz
