Hey, I got a new laptop that I got and It worked fine I had Internet and Now I cant Get online Even thought it shows on the taskbar that I am connected. No matter What I do I Cant seem to get connected >.< I plugged in my DSL Cable it did the same thing. I had to do a system restore earlier and I noticed that not only did it fix the problem It deleted all the .EXE files Althought I only checked the files inside the installed games folder I didnt check the IE folder. Im using Vista (OH JOY) And It also told me there appears to be an error with the Network devices or adapters. WTF Does that mean. I need some help.
