It gives me the error message when I click "Install" on the Autoplay menu after inserting the disc(this is an original Ren disc).

My computer has ran Renegade fine for years even when it was much worse than what it is now.

Currently running:

Win XP SP3

Athlon 3200XP

Nvidia Mobo

Radeon 9200 (After my 9800XT short circuited a while back)

1GB DDR2

DirectX 9.0c

So it's well capable of running Ren, no problems there.
