damn man the green chem spray is pretty neat,

i was thinking of a more techno effect, more like green circles like a sound wave coming out, not a gas or fire.

[EDIT]

hey guys ive had a few people come back to me with problems, and i asked them to send me the file they had and half the image was missing, meaning corrupt data. just delete and re download if problems occur.

otherwise pm me and ill send you one directly

thanks

Unit
