The only reason I use Firefox over Chrome is because: 1, Chrome is incompatible with a few things, Battlefield Heros as one thing, you can't play it on Chrome, I don't anyways(BF is boring...) but that's one downside to it imo, another is that I don't feel safe browsing without NoScript tbh, I haven't tried Opera(other than the Opera browser on my Wii) because I haven't found any need to try it.
