Yeah that looks pretty cool.

Btw I am answering to what Lil Killa said. Sorry for not quoting you but I pressed the wrong button.

And I don't mind if it has to be with all vehicle rockets. But just make sure it doesn't block my view on any of the vehicles. Because on some missile skins I've seen and played with you shoot and you don't really know what your going to hit because you cant tell where the missile went within all the shit that just came out of your vehicle or gun.
