Ok so I went to reinstall Renegade and I was struck with an issue that I can't seem to figure out.
Note: I am working with Vista

This is the issue that pops up....

Feature: Command & Conquer Renegade
Component: Renegade
File: E:\data10.cab
Error: Incorrect Function

Finding a solution has stressed me out and I would greatly appreciate some help or advice. If no one can think of the solution, let me know so I can get over it ;_;
Thanks in advance!
