I am the leader of the Axis Mod team. I am the one who is making the site, designing the mod, making some maps, working on models, and whatever I can. I am looking for some good modders to help. I need a modeler to help out S.E.A.L. I also need another good skinner to help out Xovenia since these two members are not on as much as they need to be. If you would like to help us please let me know.
