Poskov wrote on Fri, 19 June 2009 22:53 Would mods like Reborn be given a custom version of TT?

No, we all use the same version of scripts and such. The only differences would be things like what files are cheat-protected and other customizable settings that TT allows. We've been testing scripts 4.0 vigorously over at APB and I know that Reborn tests the same builds. Everything is integrated into one.
