Sk8rRIMukI am a beta tester already...

I don't have any skills that could help you to much unless you have somebody who is good with images and I could design a website for you (no php and stuff though)...

I would love to help though.

-Sk8rRIMuk I am an experienced modeler, but can only make models, and not bone them and make them work on renegade, i can just make really good models of guns and crap like that, also i can animate my models. if u r intersted in hireing me as modeler on the team i would be glad to help, u can email me @ conman231@hotmail.com or chat on msn.
