For the first 2 or 3 years of me playing Renegade, I swore by 1st person and never tried 3rd. However, once I went to 3rd, I began playing much better than I ever did before.

So now I use 3rd 95% of the time.

Thats about what i was going to say to. i started out in 1st person but once I discovered the advantages of 3rd person its what I use most of the time. I do switch back from time to time but not often.
