Glock~ wrote on Mon, 06 July 2009 22:27 Whenever I look in a certain direction, as sbh or stealth tank, I get this weird black screen. SS below

Toggle Spoiler

Basically, there's an incompatibility between scene shaders and the version of the wireframe stealth that you have installed. Unfortunately, the bugged version is the only one that I know has been made public, so the only way you can avoid the black screen *and* have wireframe stealth is to remove sceneshaders.sdb from your data directory.
