Thx man sounds good. Possible that all guys are moved to nod though please? we have a custom skin for the nod sniper..

Also we only use 3 maps atm, islands, canyon and volcano inwhich we have sealed off the bases with the red barriers and created many spawn points in the field area themselves.

I can send you these maps. I didn't actually do the maps, Reloaded takes credit for these as he made them for the server. I will work out how to do this for the rest if need be
