I wouls strongly suggest you use JonWil's leveledit.
It isnt working right because you have 'The First Decade' version of renegade. You'll have to apply a registry fix in order to get it to work.

http://www.renhelp.net/index.php?load=7

Otherwise you might want to try the original Leveledit and manually copy the scripts to you mod package Map.

NOTE: you will have to do that every time when you make a new package. JonWil's version takes the scripts automatically from the install directory so alot easier in use
