Lt Albrecht wrote on Fri, 17 July 2009 21:43Yeah..   I already did all that. Opened regedit and changed the registry entry of renegade (as detailed in that tut) so that the presets work. I have also tried using Jonwil's version of leveledit and it doesn't work either...

In short: I already tried that.
Ah k. Well im sorry but then i dont know what the problem is
Never encountered anything like that

I hope someone else can help you
