Infinintwhat your problem Sir Phoenixx hes just trying to make a gun model, you dont have to download it if you dont want to, so it not your problem

Do you even bother to read anything before replying? Who said I had a problem? He was showing off his model, and I just gave him my honest opinion and answered his question.

Was anything that I said wrong or uncalled for? Not even in the slightest.

Sir PhoenixxAlmost done? You're kidding right? You've barely modeled half of the gun. In that screenshot he's missing front iron sight, barrel, trigger guard, butt stock, and according to him, the fore grip.

Sir PhoenixxYour MP5 has very little detail (and quality). That model has little to no detail on it, everything on that model is just made out of fairly simple boxes.

If you can't take honest opinions and criticism and advice than you shouldn't be here.
