the crash in getting in a vehicle is scripts, i had that annoying problem before.
*Delete D3D8.dll
*Delete Scripts.dll
*Make a copy of scripts2.dll and rename it to scripts.dll
*Replace bhs.dll with the one attached

try go go ingame then, if it works, you may try to install scripts 3.4.4 again.

the emtry server list.. hmm.. maybe you have something you shouldn't have in your data folder?

File Attachments
1) bhs.dll, downloaded 210 times
