Goztow wrote on Wed, 02 July 2008 09:36 These bullet holes make it easier to spot that someone is shooting you and from where they are shooting you. Just like the paintbal bullet holes, actually. I think the ground hit emitters already made them plenty noticeable as is. Plus when you take damage you not only make a frickin annoying sound, but it points which direction the bullet came from, but if thats not enough the tracers aren't a dead give away either.
