Hugh72 wrote on Sun, 09 August 2009 19:02do i need a graphic card support for shaders?
no, cause as far as i know shaders.dll is a part of the 3.4.4 script and the one hes talking about is a modified shaders.dll file, and has nothing to do with shaders support i think, by the way, what graphic card you got? and do you have script 3.4.4?
