CarrierII wrote on Wed, 12 August 2009 22:33 Just a friendly tech support note:

Decheck BOTH "BLOOM" and "SHADERS" when installing Scripts 3.4.4 unless you have a PC that can run Crysis at 60+ FPS.

That's a bit of an overstatement but if you don't even have the chance to get into the BHS.DLL Options menu to check off shaders due to the black screen, you should remove the 2 .sdb files found in the data folder.
