Lone0001 wrote on Mon, 17 August 2009 16:11 I printed out a copy of that page a while ago, I scanned the the pages and converted them into a pdf, if anyone wants to put it all back manually go ahead: <http://lone0001.genesisblog.net/uploads/RenWikiClans.pdf> (Right click and press "save as")

PS. SB(SilverBullet) can be removed from that page, it's been dead for a year now.

Glad someone decided to record the list! =)

But yeah, from what I can tell, a lot of those clans are now unfortunatly dead or inactive. In fact, even some of the weblinks no longer work.
