The mods looks fantastic. Only thing is the green outline instead of the box.

I only feel it gets in the way of the model...distracts from the model. I watched one of your guys videos where you were mammy stacking in Ren X:

<http://www.youtube.com/watch?v=maHdAjTw814>

And I think I can get used to the green outline but I feel it distracts from the model and slightly takes away a realism...in Ren, the box does not interfere that closely with the model...so you are actually fighting against a real tank and not just aiming inside it's outlines which the outlines help you do.

edit: typo
