Learn to write non-blocking code or use threads.

```
HANDLE WINAPI CreateThread(  
    __in_opt LPSECURITY_ATTRIBUTES lpThreadAttributes,  
    __in     SIZE_T dwStackSize,  
    __in     LPTHREAD_START_ROUTINE lpStartAddress,  
    __in_opt LPVOID lpParameter,  
    __in     DWORD dwCreationFlags,  
    __out_opt LPDWORD lpThreadId  
);
```

```
DWORD WINAPI ThreadProc(  
    __in LPVOID lpParameter  
);
```
