It certainly is possible with your damage hacks, just pop them in and BAM. You can kill most things with 1 shot, surely you know that?

hahahahaha ROFL!

Anyway! It is possible but you need good timing, good shots, and good use of terrain. All the Mammoth tanks I killed ever while I was in a stank were making some mistake in one way or other...either by carelessly wandering away all by themselves into the field or just going in one direction.

But a good Mammoth tank driver can't really be defeated...a good tanker always fires rockets/guns in every direction to spot stanks and never allows himself to be outsmarted. Plus with good aim, a couple precise shots is all that's need against the Stank. You just gotta be aware of you surroundings.

Mammoth tanks are the really really good but only with someone who knows how to use it.
