Hey people I just want to help just incase the base is getting bombarded so you can find me behind the weapons factory/airstrip

or the tiberium refinery but it depends on what map i'm in.

So if i'm GDI i give med tanks but nod light tank.

Rules of my thing

Wait till I get a minimum of 4 tanks

Take one but bring it back

Repairs are free

If you get it destroyed buy me a new one

I would like to thank shapeshif since he gave me the idea
