Also note the player count is 1 which means it's a LAN game. "DELL" could be anyone as it's the name of a computer manufacturer and the default computer name (I think? haven't owned a dell machine in ages) so...

It's not solid evidence that it is in fact queenhunter cheating.

But I guess you guys are stubborn and won't see any other side to a story anyway. No use arguing with idiots who are one-sided in an issue.

Oh my god did you even read my post. In lan games the name of the computer is used as the playername, alongside this with the fact that there are several skins that match up with ones in ss's he posted before, and that no one in their right mind would go and give someone a skin, have them takes screenshots of it, then have them give the screenshots to you just to post them on renforums, it's pretty much queenhunter.

I also think he admitted to cheating sometime after the post.

If you read my post after that, I agreed and said pawkyfox was correct in that linked thread.

Also, if you read my post, you guys are just too stubborn and consumed with rene-politics to have any other opinion.

l2mod please.
