Fobby, I can't seem to PM you because of the flawed forum software thinking your account doesn't exist due to characters in your name, but I want to ask if I can copy this post on another forum (it's a heavy gaming/emulation/PC enthusiast community). I will, of course, link back here to the source. LeeumDee wrote on Sun, 30 August 2009 20:12time to get myself another 9400GT and sli up!

Cannot wait! AwesomeWhy waste your time? Just get a better graphics card. GeForce 9400GTs in SLi aren't even as strong as a GeForce 8800GT/9800GT, or even the GeForce 9600GT, both of which can be had very cheap. A GeForce 9600GT beats two GeForce 9500GTs in SLi, so don't think you'll gain much by adding another 9400GT. Just get another card. Even a GeForce 9600GT would be okay.
