Subject: RG Connects to Malicious IP
Posted by twig123 on Wed, 02 Sep 2009 21:21:00 GMT

Guys,

I have Malwarebytes anti-malware software installed on my system...
Every time I start RG I get a warning that access to a malicious IP has been blocked (IP: 213.131.252.251).

What is this IP and why does RG keep trying to communicate with it?

~Dave
