Sounds like it would be a cool idea, but the first problem that comes to my mind is... if you put a number or a picture on one side of the vehicle it mirrors backwards onto the other side. I personally don't mind that effect so much, but I remember some other people complaining about it on past skins.

I actually started to make a Red Bull themed hummer skin once, but had trouble with this and other problems with how the DDS wraps around the model.
