Blazea58 wrote on Tue, 29 May 2007 10:05I was bored and browsing websites when i saw the concept TruYuri drew up on the APB forums. I figured i would have a go at trying his concept, though it is far from exact but has alot of the same features. Not sure how this would work ingame, would probably need a few pivoting parts that would have animations attached for arm peices.

Name: Apoctek
Designer: TruYuri
Armour: Stainless Steel
Wheels: Tracks (2)

Nearly a year-bump but holy shit, I was never notified that this was modelled out.
