Subject: *SIMPLE* How do I install this freakin LFDS
Posted by fl00d3d on Mon, 18 Aug 2003 00:19:13 GMT

I'm running RH 7.3 and I know where to download both the tar and non-tar versions of the gz file.

I'm somewhat knowledgable on *nix platforms (enough to move around and understand how the system works). And I know everything about the FDS.

Now ... what do I do?

(1) Do I extract it
(2) Where do I extract it to
(3) Is there something else to do to "install it"
(4) How do I run it

I need simple answers like those. Hell, send me an email at cryptowizard@speakeasy.net if you're willing to help.

I don't want to make this difficult, but apparently it is.

Someone pls help.
