CdCyBoRg wrote on Mon, 27 July 2009 19:16I just downloaded renegade public tools, opened leveledit, made a package, no presets. so i extracted objects.ddb from always.thu and put it in my Package folder/Presets

Now when i try opening the package, it crashes.

any reasons why?

Thanks in advance.

That because your doing it wrong , or at least in your discription here, your doing it wrong.
