No one objected to the time being an hour early, or at least no one voiced an opinion otherwise....We've decided however on playing on an American server. They don't like the idea of playing on a server across the seas. (Yes, I can see it from your perspective that you (most of you?) will be overseas playing on American servers, sorry. :/)

So, Saturday, September 26, 2009 at 8PM GMT it is on one of the US-hosted servers.
