As far as I know there probably will be enough servers that only will block like scope/stealth/c4/beaconskins.

So you can still make plenty use of your skins.

Also what I would do is find a server that isnt blocking your skin.

There are tons of servers and probably alot will allow skins.

I mean 'oh noes I cant use my scope skin' well then there is still a lot of different skins you can edit. And to quit a game because you cannot use one skin would be a bit stupid.

Also there is no harm done yet. Who says it will be?
