Altzan wrote on Sat, 03 October 2009 16:58I'm gussing you're messing around with overlays and layers like I used to (and still do).

The effect you added looks nice, but it doesn't cover the MRLS very well in my opinion. More magma or a better magma texture would make it look better.

Also blurring the actual MRLS would help, making it seem like it was starting to melt.
looks like a red plastic wrap
