StealthEye and I once investegated the win/loss ratio for both teams on each map. End of the matter is that it is about 50-50. With pointfix it seems to be even closer to 50-50, but only marginally. Marginally because there wasn't much room for improvement anyway (1 or 2% perhaps)
where did you investigate?  in renegade overall, like all of the servers combined?  you're saying that every single map is almost perfectly 50-50?  i really do have a hard time believing that, for a few reasons

you're welcome to change my mind with an explanation
