KaTaNa wrote on Thu, 08 October 2009 20:15l recently put my nickname in and put on the remember your password by mistake I recently changed the password and my nick still won't let me remove the tick where the remember your password is so im always logging into my account that won't connect due to the password change

When you start your game on multiplayer there is a column on your left use it.its kinda hidden but when you move your mouse over to the left side it will display then go from there and make you adjustments.
