StealthEye wrote on Fri, 09 October 2009 10:51 It's true that servers with a 126 max player count will end up on top though. Don't really think that's desirable. However, I don't think there's something better to sort on... Perhaps just random.

Sort on max player count ascending. Meaning if 2 server have 20 players in it each, the one that's most filled will be just above the other one. It makes sense. If I want to join a server with 20 players in it rather than a server with 30 players in it, I'll choose the one that's closest to full with those 20 players.

This should be very rare anyway, as it's the 4th element in the line.
