Ok, so I have tried it every way I could think of... but it still crashes...

So if someone would please edit the files for me but take a SS to show the difference I would be very grateful.

I only ask because it sounds easy enough, but I am a n00b.

Just to make sure everyone is clear on my goal: I am trying to make it so General Locke replaces the desert Havoc.

Here are the files to save some time.
